Course Description

This course covers individual income taxation laws and regulations, with emphasis on preparation of tax returns and forms. Topics include gross income and exclusions, business and personal deductions, exemptions, tax credits, property transactions, and capital gains and losses as they apply to individual filers. Transfer Credit: CSU.

Course Level Student Learning Outcome(s)

1. Course Outcomes
2. Differentiate between gross income exclusions, for AGI deductions, and itemized deductions.
3. Calculate passive activity gains and losses.
4. Calculate capital gains and losses and related taxes.
5. Calculate income tax liability and income tax payable or refundable for an individual filer.

Course Objectives

- 1. Identify the determinants of taxable income such as gross income inclusions and exclusions, deductions, exemptions, and phaseouts.
- 2. Calculate income tax liability under the basic income tax model for individuals of all filing statuses.
- 3. Identify the various components of business income and expense as they are compiled in Schedule C.
- 4. Specify the methods to satisfy income tax liability such as tax credits, withholdings, and estimated tax payments.
- 5. Prepare common individual tax returns and forms, including but not limited to Form 1040 and related schedules.
