Course Description

Formerly: GERO C131. This course content is specifically targeted to students who are interested in understanding the non-medical in-home care industry and/or in operating an in-home care business. Provides in-depth information about the applicable California regulations that apply as well as the real-life challenges of operating an in-home care business. ADVISORY: BIOL C120 or SOC C120. Transfer Credit: CSU.

Course Level Student Learning Outcome(s)

1. Interpret and apply major theories and principles of aging to determine their impact and implication on the caregiving environment.
2. Apply regulatory requirements and care techniques and provide clear documentation and communication with regulatory agencies and clientele.
3. Apply valid research principles in the creation of a plan for a Home Care Business.

Course Objectives

- 1. Differentiate between medical and non-medical in-home care and be able to locate and follow the regulations for home care, with a focus on California.
- 2. Communicate with clients, assess client needs, observe and document care.
- 3. Discuss the practical issues in operating a Home Care Business.
