Grading Policy	Standard Letter (S)

Course Description

Introduction to medical terminology for body structure, body systems, and diagnostic work. Prefixes, suffixes, word roots, and combined word forms. Includes instruction in spelling, definition, and pronunciation. ADVISORY: BC C104 or ability to use Microsoft Windows. Transfer Credit: CSU.

Course Level Student Learning Outcome(s)

1. Analyze specific medical terminology to create medical records or insurance claim forms used in medical facilities.

Course Objectives

- 1. Spell, define, and pronounce medical terms dealing with body systems, body structure, medical procedures, and pathological conditions.
- 2. Apply knowledge of medical terminology to understand the medical terms in their proper contexts, such as medical reports and records.
- 3. Incorporate the appropriate terminology from patient files and physician notes.
- 4. Analyze medical terminology to produce professional medical documents

Lecture Content

Writing Terms with Suffixes and Combining Forms Diagnostic Procedures and Therapeutic Systems Organization of the Policy Musculoskeletal System Cardiovascular and Lymphatic Systems Respiratory System Digestive System Urinary System Reproductive System Integumentary System Nervous System and Psychological Disorders Endocrine System

Method(s) of Instruction

- Lecture (02)
- DE Online Lecture (02X)

Instructional Techniques

A variety of instructional techniques will be employed to encompass different student learning styles. These may include, but are not limited to, lecture, discussion, projects, and small group activities. Instruction will be supplemented, where appropriate, by digital media presentations resources, guest speakers, and field trips.

Reading Assignments

Students will complete reading assignments assigned from the textbook, supplemental readings, handouts, Internet resources, and any assignments from the Coastline Library.

Writing Assignments

Weekly projects, quizzes, discussions, essays and exams demonstrating skills acquired then applied.

Out-of-class Assignments

A. Review the chapter lectures. B. Review the chapter PowerPoint presentations. C. Complete the exercises in the textbook. D. Complete the practice quizzes. E. Complete the chapter exams

Demonstration of Critical Thinking

The final exam will include three or four questions on topics relating to the medical specialties covered in the course. These questions might include a definition of the specialty and the professionals who are included in that specialty

Required Writing, Problem Solving, Skills Demonstration

The final exam is an essay and will include three or four questions on topics relating to the medical specialties covered in the course.

These questions might include a definition of the specialty and the professionals who are included in that specialty. Students will match terms with body system illustrations. Students will listen to the pronunciation of medical terms and will correctly spell the terms.

Eligible Disciplines

Office technologies (secretarial skills, office systems, word processing, ...): Any bachelor's degree and two years of professional experience, or any associate degree and six years of professional experience.
