

STUDENT SUCCESS CENTER

Tutoring Services

Orange Coast College offers free tutoring services to OCC students in most subject areas. Our services include one-on-one appointments, drop-in tutoring, study groups and workshops.

Math Center

The Math Center is located in MBCC 218 and is staffed by faculty and tutors.

The Math Center provides all Math tutoring services.

The Math Center also supports students in their current math classes at the level they need. We provide instruction, workshops, worksheets, videos, and publisher resources to review math skills from lower math courses, free of charge. Students have access to study spaces, study groups, and non-credit math skills courses.

Science & Engineering Tutoring Center

The Science & Engineering Tutoring Center (SETC) offers scheduled tutoring appointments both online and on campus as well as study skills workshops, course specific study groups, and drop-in tutoring for Science, Engineering, and Computer Science courses. Students can make appointments with tutors online or by coming into the Center. If you have any questions, please visit the Science & Engineering Tutoring Center in person.

Classrooms & Labs (C&L) 103

Writing & Humanities Tutoring Center

The focus of the Writing & Humanities Tutoring Center (WHTC) is to help students become more competent and confident writers and critical thinkers. The Center provides learning assistance and support to all students seeking help with writing work for any class on campus. Students can also come to the Center to receive help from tutors with specialized knowledge of the following academic subjects: the humanities, the social and behavioral sciences, foreign languages, English as a Second Language, and accounting. Our tutors help students achieve their academic and personal goals. Overseen by English faculty, in collaboration with faculty from other divisions, the WHTC provides self-directed one-on-one tutoring, Directed Learning Activities (DLAs) that strengthen specific skills, group workshops, and study groups.

Tutors are trained in interpersonal communication, study skills techniques, and the Socratic method; they are also ready to help students deepen their understanding and participation in the writing process.

The mission of the WHTC is to create a nurturing environment that supports all student learning.
